## ERP for SME

In current globalised scenario, every enterprise is looking for increased productivity and controlling cost to compete both in the domestic and international market.

The name of the game is about speed of response to change. This can be achieved by having access to the right information at the right time by deploying the right IT. Syscon enables this through its comprehensive and a tightly integrated Enterprise Resource Planning (ERP) product Syscon Cronus for the SME segment.

Keeping the functionality, Technology and the market demand in mind, we have spent over 100 Man-years in developing a comprehensive solution. Syscon Cronus addresses most of the functional and statutory requirement of Small and Medium Enterprises (SME).

### Integrated Modules

#### Core Modules

- Sales
- Despatch
- Purchase
- Stores

- Payroll

#### MIS tool

Info Engine - Executive dashboard

*Key to business growth*

### **Scalability-Deploy and upgrade easily**

Syscon Cronus is a robust integrated application easier to install, train, implement and maintain.

Syscon Cronus is supported right from 1996. Along with the growth of the industry, the Syscon Cronus also has scaled its functionality and technology constantly. Such updates are provided for the customers regularly to ensure seamless working of the application.

### **Technology**

Syscon Cronus is designed and built on Microsoft Technologies.

Front end: Visual basic

Database: MS SQL Server as database.

Operating System: Microsoft Server 2003

### **Rapid implementation- Speed and accuracy**

Well trained professional are involved in the process of implementation to provide assistance right from forming the Core team, Training, Implementation, Porting of data, opening balances and parallel process right up to going live. Syscon also provides constant post implementation support. Syscon's watertight implementation method delivers the desired business results and quick Return on investment.

### **Quick and simple to adopt**

Regular employees of the organization can be trained on Syscon Cronus. Basic knowledge on the Microsoft office is good enough to work on Syscon Cronus.

### **Selective Modules**

The Customers can opt and implement selective modules and extend to other modules at any point of time.

### **Web model-Work smarter, Faster and Cost effective.**

Syscon Cronus with the power of Microsoft technology enables the users to use the application through web. This gives freedom to your employees to work almost anywhere by accessing the application using any Internet connection. The web model helps SMEs to focus on their business rather than on the technology. Maximize the productivity of IT by reducing the complexity of Creating, Deploying and Managing the application.
